Profile

I am a Bachelor of Science in Information Technology student at City College of Calamba, with a strong passion for graphic design, photo editing, and video editing. While my academic background allows me to explore programming and technology, my true interest lies in the creative side of digital media and visual communication.

I enjoy turning ideas into visually appealing designs, experimenting with colors and typography, and creating engaging content through images and videos. I am continuously developing my creative skills, exploring new design techniques, and building my portfolio to pursue a career in graphic design.

As an aspiring graphic designer, I believe that creativity, patience, and continuous learning are essential to producing meaningful and effective designs. My goal is to grow as a designer, express my creativity through every project, and transform my passion into a professional career.
